

## Windows 10 Anniversary Patch Function Key Work Around

If you are getting a “Parent Window Not Found” error when trying to use the function keys within ACBLScore, follow these steps:

1. When you open ACBLScore, click on the GAME option in the Menu bar
2. Then press the TAB key to move from the first field containing the name of the game to the second field containing the time of day of the game
3. Once the second field is highlighted, the Function Keys become useable again and you can press F2, F3 or F5 to see a list of games to select.
