

Acceptable File Formats for ACBLscore game file, Hand Records and Contract file

ACBLscore Game File:

- If you are uploading only ACBLscore Game File, the file type/format should be an HTML (Hypertext Markup Language) file.
- If you are uploading both ACBLscore Game File and Hand Records, the file type/format should be a Text document.

If you are not familiar with the file type/formats, read the corresponding instruction manual to create the result file with the correct file type/format.

Hand Records:

Accepted file type/formats for this file are

- PBN - Portable Bridge Notation
- LIN - Bridge Base File
- DUP - Duplimate File (DOS Version)
- DLM - Duplimate File (Windows Version)

We do not provide help/support for creating the hand records. Please contact your software provider if you have any questions regarding the software.

Contract File

Accepted file type/format is .bws (BlindWrite Subchannel Data file)

We do not provide help/support for creating the hand records. Please contact your software provider if you have any questions regarding the software.
