

## Strategic Committee Report

Washington, DC

Summer 2016

The committee reviewed the power point strategic framework, metrics to document /measure ongoing progress and comments from Board members. We recommend an action item: that the Metrics and Strategic Planning deck be make available on the web to members and should be augmented with testimonials to give life to our progress.

The committee was highly complementary of the staff ownership, work plans and progress reports and were impressed by the innovative approach and challenging tactics they have set to achieve our goals. We look forward to feedback from the board and seek validation of the organization priorities and the goals for each of these priorities.
